

**SUBMISSION TO IPART REVIEW**  
**SOLAR FEED-IN TARIFFS 2017/18**

**Tuesday, 9 May 2017**

As a resident of a city that has adopted solar electricity with great enthusiasm I am keen to see a fair price for solar.

I believe the feed-in tariff should increase in line with the price of wholesale electricity and should be regulated to be offered as a minimum by retailers rather than as an advisory price.

The solar bonus scheme made it feasible for me, as an ordinary householder, to install solar panels. I then enjoyed the benefits of this generous scheme for several years.

I believe renewables are the only viable power option for the future and hope that IPART will play its role by making recommendations that encourage communities to adopt solar power.
