SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017

5:11:41 PM

I strongly support a fair price for solar power and believe that the feed-in tariff should increase in line with the wholesale price of electricity.

The feed-in tariff should not just be a benchmark range; it should be regulated so retailers have to offer it as a minimum.

The feed-in tariff should represent the true value of solar; this means recognising the environmental and health benefits and the network benefits of rooftop solar.

We have taken the trouble and expense to install solar panels and feel that the feed-in tariff should at least equal the charge for kilowatts used from the grid.
