SOLAR FEED-IN TARIFFS 2017/18

Sunday, 21 May 2017

10:15:27 AM

I support a fair price for solar. My house currently uses it's own solar panels, however we would be able completely power our house just on solar if there was a fairer price when buying it from suppliers.

The feed-in tariff should increase in line with the wholesale price of electricity;

The feed-in tariff should not just be a benchmark range, it should be regulated so retailers have to offer it as a minimum;

The feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar
