SOLAR FEED-IN TARIFFS 2017/18

Tuesday, 9 May 2017
5:15:18 PM

I support a fair price for solar;
The feed-in tariff should increase in line with the wholesale price of electricity;
The feed-in tariff should not just be a benchmark range, it should be regulated so retailers have to offer it as a minimum;
The feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar;
After living in Queensland and usually receiving a credit on our power bill, we now live in NSW, generating much more solar power than we use, and still having a quarterly bill of around \$300.00, it's ludicrous that Origin are profiting from our energy contribution.
