SOLAR FEED-IN TARIFFS 2017/18

Wednesday, 10 May 2017
10:43:07 AM

I support a FAIR price for solar. I strongly believe, expect a fair and just feed-in tariff that should increase in line with the wholesale price of electricity. The feed-in tariff should not just be a benchmark range, it should be regulated so retailers MUST offer it as a minimum tariff. The feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits; and the network benefits of residential rooftop solar systems.
