SOLAR FEED-IN TARIFFS 2017/18

Sunday, 21 May 2017

4:27:15 PM

Dear Friend

I am writing to support the proposed increase in the NSW solar feed-in tariff benchmark to 14/6c per kWh.

I support a fair price for solar energy and consider that the feed-in tariff should increase in line with the wholesale price for electricity.

The feed-in tariff should be regulated, so retailers must offer it as a minimum to solar energy owners.

It should represent the true value of solar, taking into account the benefits for the environment of having a rooftop solar network.

Yours sincerely,
Celia McGregor
