SOLAR FEED-IN TARIFFS 2017/18

Sunday, 21 May 2017

6:13:44 PM

I support a fair price for solar energy and this you should legislate mandatory minimum feed in tariff price of at least 20c/kWhr net for all feed in solar. The feed-in tariff should increase in line with the wholesale price of electricity. The feed-in tariff should not just be a benchmark range, it should be regulated so retailers have to offer it as a minimum; The feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar. It's now a diverse system it needs to be embraced not strangled by price.

Kind regards

Celeste Salter
