

SUBMISSION TO IPART REVIEW
SOLAR FEED-IN TARIFFS 2017/18

Saturday, 20 May 2017

10:10:48 AM

It seems unfair that the electricity that I produce is seen to be of lesser value than the electricity I purchase.

Energy production is in a transition phase which will increasingly rely on renewables, rooftop solar will play a big part. If feed in tariff is increased then there will be greater uptake and investment in household solar.

An increase in the feed in tariff will provide greater incentive to take up the technology, and possibly reduce the need for Govt. subsidy.
