SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017

5:25:55 PM

I support a fair price for solar.

The feed-in tariff should not be a benchmark range. The feed-in tariff should be regulated so that retailers are compelled to offer the minimum price. The true price of solar must reflect the environmental, health and network benefits inherent within renewables such as so,at.
