**SOLAR FEED-IN TARIFFS 2017/18**

**Sunday, 21 May 2017**

9:15:55 AM

I support a fair price for solar. I support the IPART proposal that the feed-in tariff should increase in line with the wholesale price of electricity. The feed-in tariff should be regulated as it is clear that retailers will not offer a fair price without government intervention. And the feed-in tariff should represent the true value of solar as a carbon-free source of electricity and thus a significant contribution to managing international climate change goals.
