SOLAR FEED-IN TARIFFS 2017/18

Tuesday, 9 May 2017

9:21:42 PM

I support a fair price for solar I feed into the grid.

The feed-in tariff should increase in line with wholesale price of electricity.

The feed-in tariff should not just be a benchmark range, it should be regulated so retailers have to offer it as a minimum.

The feed-in tariff should represent the true value of Solar, this means recognising the environmental and health benefits and the network of rooftop solar.

We have enjoyed the benefits of our solar array for nearly six years after considerable expenditure in installing it but feel we should enjoy a feed-in tariff more in line with the price we have to pay when buying electricity from the grid, than the 6 kwh we now receive.
