

SUBMISSION TO IPART REVIEW
SOLAR FEED-IN TARIFFS 2017/18

Friday, 12 May 2017

9:31:43 AM

I am a solar panel system owner and can't stress how much the feed in tariff rate should be increased. The power companies are not giving fair equitable prices for feed in.

The feed in should represent the true value of the solar. The government has to wake upto the fact that the only solution longterm to the energy crisis in this country is renewable. I will be watching closely what major parties are offering in terms of renewable energy policy.
