SOLAR FEED-IN TARIFFS 2017/18

Wednesday, 10 May 2017
3:21:03 PM

I do support a fair price for my feed-in solar; as a retired person who put solar panels on the roof because I recognise a need for using the sun in Australia for power!!!

Monies saved are only one items for my decision, contributing to the environment and health for the earth were also important. A fair price for my solar feed-in to the grid is necessary for me (on a limited income) and my peers, proposed by IPART.

Kind regards, Dr Nerida Ambler.
