

SUBMISSION TO IPART REVIEW
SOLAR FEED-IN TARIFFS 2017/18

Tuesday, 9 May 2017
3:48:24 PM

IPART submission.

I consider that households with solar panels should receive a feed-in tariff that is always in line with the wholesale electricity price. Retailers have easy access to households as all the connections (poles and wires) already exist. The feed-in tariff needs to be a stipulated minimum rate so that retailers can offer a higher rate if they wish to benefit from easily sourced electricity from individual homes. The benefit to the environment is to be shared by all by using solar energy which is both renewable and non polluting. Yours sincerely, [REDACTED] Dale Andrews
