

SUBMISSION TO IPART REVIEW
SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017

3:07:13 PM

Thanks for the opportunity to make a submission regarding this proposal. I would like to congratulate IPART for moving towards recognising the benefits of solar and note that I support your efforts to create a fair price for solar.

The feed-in tariff should increase in line with the wholesale price of electricity. I also strongly believe that the feed-in tariff should not just be a benchmark range, it should be a regulated range so that retailers have to offer it as a minimum. The feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar.

Thank you again for this opportunity and I look forward to a positive outcome for a better deal for people who are doing their part to improve the environment and reduce demand on existing generation infrastructure and improve clean energy supply.
