SOLAR FEED-IN TARIFFS 2017/18

Sunday, 21 May 2017

12:31:00 PM

I support a fair price for solar;

The feed-in tariff should increase in line with the wholesale price of electricity;

The feed-in tariff should not just be a benchmark range, it should be regulated so retailers have to offer it as a minimum;

The feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar.

The subsidised feed in tariff made managing our household finances achievable.

Living in rural Australia where there are limited employment opportunities for the average family paying bills is challenging with inconsistent income. Being able to rely on our solar system to cover power costs is one less stress during difficult times.

Please support a fair price for solar electricity, it's essential.
