**SOLAR FEED-IN TARIFFS 2017/18**

**Tuesday, 9 May 2017**  
11:28:01 AM

Please note my following submission with regard t solar feed-in tariffs.

- I support a fair price for solar;
- The feed-in tariff should increase in line with the wholesale price of electricity;
- The feed-in tariff should not just be a benchmark range> It should be regulated so retailers have to offer it as a minimum;
- The feed-in tariff should represent the true value of solar, this means recognising the environmental and healthbenefits and the network benefits of rooftop solar

Currently I am paid 6c per kwh that my solar produces, while I am charged 26c to consume it. This is wrong. We need to be encouraging excess solar into the grid as a decentralised and cheap method of getting renewable energy into the grid.
