**SOLAR FEED-IN TARIFFS 2017/18**

**Tuesday, 9 May 2017**  
6:56:20 PM

I have recently received my latest electricity bill and was shocked to see my new solar feed back tariff. Where before in a quarter I would get \$350.00. It has dropped to \$30.00. It seems to me like collusion between the electricity suppliers, to make money out of people who are feeding their solar into the grid. Then they go and charge for what they have received for nothing from people like myself.

A fair price should be given to those that have invested in environmentally clean energy and who are supporting the future, we should be getting back what is being charged per kilowatt by these greedy companies.

Stop the collusion and think of the future, what is best for Australia.
