

SUBMISSION TO IPART REVIEW
SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017

1:39:30 PM

I am very much in favour of a fair price for solar. Those who have taken it up are increasing in number. It needs to reflect the true benefit and value of making this commitment, and will encourage others to see the value in up take into the future. All people on solar need to be on the same feedin tariff. The very early ones paved the way and were rewarded. My husband and I have only been able to do it 2 1/2 years ago even though we agreed in principal for years.
