SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017

4:14:46 PM

I support a fair price for solar.

The new tariff needs to be a responsible decision, regulated as at least a minimum, it should reflect the real value of solar as funded by private persons/bodies and being non-detrimental to the environment.

It should increase in line with the wholesale price of electricity
