

SUBMISSION TO IPART REVIEW
SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017

12:48:42 PM

I strongly urge that IPART implement a fair and realistic price for solar energy which represents a true price for the generation of such power. There is no doubt that rooftop solar generated power is advantageous to health and environmental factors. The feed-in tariff must be such to encourage and reward those who implement such measures.
