

SUBMISSION TO IPART REVIEW
SOLAR FEED-IN TARIFFS 2017/18

Tuesday, 9 May 2017
10:45:02 AM

I believe that the electricity companies should be paying a higher price for the feed in tariffs as home owners with panels are doing there part to help the environment and reduce the need for electricity companies to burn coal or gas to produce electricity and therefore saving them money on buying coal or gas and reducing cost on maintenance of the generators and buildings of the power stations
