SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017
12:03:03 PM

The utilities make a fortune using our excess power and they should not be allowed to exploit solar users.

The feed-in tariff should not just be a benchmark range, it should be regulated so retailers have to offer it as a minimum.

The feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar.
