

**SUBMISSION TO IPART REVIEW**  
**SOLAR FEED-IN TARIFFS 2017/18**

**Friday, 19 May 2017**

12:38:09 PM

I would like to support IPART in their proposal to bring the solar feed-in tariff in line with the wholesale price of electricity. It is important that due recognition is made of the environmental and health benefits of solar energy and that the country is set on an achievable path towards renewables by networking communities using solar panels.

Australia is lagging far behind many other countries who have achieved great results. This is the time to step up to their responsibilities.
