SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017
11:58:52 AM

As an aged Pensioner who purchased a solar system to both help the ecology and save the future of our planet, I request you consider the following.

Please increase the tariff we receive for feeding solar power back to the grid in line with the cost of electricity purchased.

Some older pensioners cannot afford to pay the higher cost of electricity and may go cold this Winter.

Thank you.
