Submission: "Dear IPART,

I writing to express my great disappointment on hearing the solar feed-in Tariff is being reduced to 8c. As an aged Pensioner we found the money to install the minimum solar panel on our roof for two reasons. One was to save money on electricity charges and the other to take pressure off the whole energy system.

How have we been rewarded? By dropping this tariff yet again.

This is totally unfair.

To think of what we are charged to complement what we produce , it is just unfair.

The FiT needs to be regulated.

How can our nation expect new solar collectors to be installed to help fight climate change when this situation is allowed to continue.

I ask you to look at this matter and give the people who have outlaid hard earned money for good and genuine reasons ,an Aussie 'fair go'.

Thank you."
