

SUBMISSION TO IPART REVIEW
SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017

12:55:43 PM

We may be just small producers but we are wholesalers of electricity. We pump much needed electricity into the grid during hours of greatest demand yet we get paid virtually nothing.

The rate we are paid should be commensurate with the rate larger wholesalers are paid (adjusted for tax) based on the time of production.

Alternatively we could all just turn our systems off simultaneously 1 day per week and lets see how dispensable we are.
