**SOLAR FEED-IN TARIFFS 2017/18**

**Friday, 19 May 2017**

2:48:00 PM

I support a fair price for solar.

The feed-in tariff should reflect it's real value regarding environmental merit particularly which is why I went to the expense of installing panels on my roof in the first instance. I felt it was a very real way I could personally do something positive for the environment
