

Dear Mr Rush

Please accept this email as my submission in response to the proposal to alter the pricing metric for water supply, sewage services and stormwater drainage on the Central Coast.

Many residents of the Mangrove Mountain Districts have received notification via a letter from Central Coast Councils, Jay Spare, proposing significant changes to the charges applied for Drainage services.

The calculation proposed has alarmed the residents and whilst the opportunity to apply for a "Low Impact" assessment is noted, there are no protocols, as yet to define "Low Impacts".

I believe it would be prudent to require the proposal from Central Coast Council to specify the criteria for assessment prior to making the application to Ipart.

Kind Regards

Stephen and Elaine Raines
Mangrove Mountain Residents
