SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017

12:57:59 PM

I feel strongly that the feed-in tariff should not only reflect wholesale prices of electricity but also the environmental and health savings. I believe it shocking that so many small scale solar producers (like me) are being underpaid to support large scale polluters.

Please ensure that we get a fair price for our energy production.

Thank you

Ellen White
