SOLAR FEED-IN TARIFFS 2017/18

Tuesday, 9 May 2017
11:38:23 AM

I support a fair price for solar.

The feed-in tariff should increase in line with the wholesale price of electricity.
The feed-in tariff should not just be a benchmark range, it should be regulated so
retailers have to offer it as a minimum.

The feed-in tariff should represent the true value of solar, this means recognising
the environmental and health benefits and the network benefits of rooftop solar.
Suggest a proportion of funds energy providers gain from the cheap solar power
should be committed to e.g. a government managed solar storage incentive
scheme for householders.

Regards. Emmo
