SOLAR FEED-IN TARIFFS 2017/18

Tuesday, 9 May 2017
3:59:58 PM

I strongly support a fair price for solar power.

At the moment solar owners are not being paid a price that is even close to what the power is worth.

The feed-in tariff should be increased in line with the wholesale price of electricity and should not just be a benchmark range, but regulated and made mandatory so that retailers have to offer it as a minimum.

The feed-in tariff should represent the true value of rooftop solar, i.e. it should recognise -

- the environmental benefits
- the health benefits, and
- the network benefits.
