SOLAR FEED-IN TARIFFS 2017/18

Wednesday, 10 May 2017
10:31:33 AM

Absolutely imperative to have a fair and competitive solar feed in price to encourage all Australians to do all they can to help our country get off the coal fired power band wagon , join the solar band wagon and which in turn deflects the downward spiral we find ourselves in with global warming, insufficient power supply , sky rocketing electricity billsI could go on .

For a relatively small input from a good feed in price , good outcomes will be ten fold for our lucky country !
