**SOLAR FEED-IN TARIFFS 2017/18**

**Wednesday, 10 May 2017**

4:49:32 PM

I strongly support a fair price for solar;

I believe that the feed-in tariff should increase in line with the wholesale price of electricity, as far as possible, without burdening our national budget too greatly;

The feed-in tariff should not just be a benchmark range, it should be regulated so retailers have to offer it as a minimum;

The feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits for our planet, and the network benefits of rooftop solar.
