SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017

10:22:02 PM

I agree with a set price that is regulated so that retailers have to offer the minimum price for solar feed in tariff and this should increase with the wholesale electricity price. The feed in tariff should reflect the true value of solar because at present the electricity produced is well short of what the electricity companies are charging. At present the electricity companies are making money at the expense of those who have solar on their roof.
