SOLAR FEED-IN TARIFFS 2017/18

Tuesday, 9 May 2017

1:49:17 PM

Dear IPART

I support a fair price for solar;

The feed-in tariff should increase in line with the wholesale price of electricity;

The feed-in tariff should not just be a benchmark range, it should be regulated so retailers have to offer it as a minimum;

The feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar.

My wife and I are unemployed and both in our 60's we purchased a rooftop solar for \$17,000.00. The input credits were supposed to be \$0.60 but the NSW

Premier Barry O'Farrell lied and cheated and reduced the input credit.

There is one thing that a person can do to combat climate change and that is to install rooftop solar and we are betrayed by our own Government, it is an absolute disgrace.

Please accept my submission.

Your sincerely

George Clark
