SOLAR FEED-IN TARIFFS 2017/18

Thursday, 11 May 2017
6:23:20 PM

I support a fair price for solar with the feed-in tariff being increased in line with the wholesale price of electricity. The feed-in tariff should not just be a benchmark range, it should be regulated so retailers have to offer it as a minimum and the feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar.
