

SUBMISSION TO IPART REVIEW
SOLAR FEED-IN TARIFFS 2017/18

Saturday, 20 May 2017

10:50:11 AM

We have gone at great expense to install solar panels to help the environment and health benefits. We have, since January, saved a huge amount of carbon monoxide going into the air and causing pollution. We have installed a battery to help us and the environment. Retailers should be forced to pay a better price for the energy we produce and they resell at a huge profit. We are helping the environment. It is ridiculous the price we are being paid for our solar power and still the retailers charge us a huge amount just to have an electrical connection to our home. We should be able to charge them a fair price for the solar power they are taking from us. It is just so wrong. We are trying to provide a much better environment.
