

**SUBMISSION TO IPART REVIEW**  
**SOLAR FEED-IN TARIFFS 2017/18**

**Friday, 19 May 2017**  
11:57:24 AM

As a modest 2kw solar system owner, I strongly support a fair regulated minimum price for the FIT that I receive for my excess solar production. Any FIT that is paid should be incrementally tied to increases in wholesale electricity pricing.

I committed to the procurement of rooftop solar despite being an extremely low user of electricity (ave. c. 4.5 kW per day) as an expression of support for a cleaner environment despite the fact that I'm unlikely to recoup my \$4.7k outlay for a very long time.

A fairer FIT should be the least reciprocal commitment from the regulators.
