SOLAR FEED-IN TARIFFS 2017/18

Wednesday, 10 May 2017
11:14:44 PM

I invested in a far greater greater solar than my electricity needs but now the new net system is giving us a ridiculous price. The feed-in tariff should increase in line with the wholesale price of electricity;
The feed-in tariff should not just be a benchmark range, it should be regulated so retailers have to offer it as a minimum;
The feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar
