

SUBMISSION TO IPART REVIEW
SOLAR FEED-IN TARIFFS 2017/18

Tuesday, 9 May 2017

6:06:19 PM

Some points for IPART to consider: That IPART should support a fair price for solar.

The feed-in tariff is a miserable 6c/kWh and should increase in line with the wholesale price of electricity otherwise it is as miniscule and miserable as the 4c petrol docket. Worth 5% when fuel was 80 cents but less than 3% now it's \$1.50.

The feed-in tariff should not just be a benchmark range, it should be regulated so retailers have to offer it as a minimum.

The feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar. Even more so with an installed battery at home. sincerely, Glenn Hughes
