SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017

12:49:48 PM

Thank you for your proposals for a fair price for solar power generated by roof top solar panels. I agree that feed in tariff should be linked with the wholesale price of electricity. But I do not agree that there should be a benchmark range. A price should be set and retailers should be required to pay at least this amount for power sold to them. If they wish to offer a higher price for competitive reasons they should be free to do so.

When calculating the fair price for the solar feed in tariff the network, environmental and health benefits should be recognised and included in the calculation of the price.

Garry Moffatt
