SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017

12:37:56 PM

The large electricity are making a huge profit buying back the solar electricity for 6cents & reselling it for 28cents.

Iam a pensioner & had solar panels installed to save money & to help the environment however I have recieved very little benefit.

I feel that the feed in tariff should be raised to a more equitable amount.
