SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017
12:13:20 PM

I fully support a FAIR PRICE for Solar. The price paid at the moment is totally inadequate. After struggling to be able to pay for it and then to not get a fair price in return, I am very disappointed.. We are doing our bit to use clean energy and are being taken advantage by the big companies.. We are pensioners and put the solar on so that we can at least stay cool in summer and hopefully warm in winter but that is not going to happen if something doesn't change in the pricing habits of these greedy companies. We already use less than a 1 person household and we just got our Bill and all we received for our Solar fed in was a lousy \$4.35. This surely can't continue or we will be living by candle light and cooking our dinner on an open fire in the back yard. I am fast losing faith in the regulators and Government of this country.
