Submission: I have to say how ripped off and overlooked I feel with this scheme. You brought it in, started charging the tax but then give us no way to refund it. If you wanted to just bring in a for the hell of it tax or a cleaning crew tax you should have stated that not some dirty cunning scheme! You have given us no ability to return our bottles and cans meaning that your expected response won't have an affect here because with no way to regain the tax back people will just continue littering! Personally we have a number of large boxes and bottles to be returned and it is REALLY frustrating having to keep these in the house just in the hope we may at some point get the ability to gain the tax back. You've given Forster two points one of which apparently is always full anyway (great job there by the way ... a collection point that's always out of order through over-use) and it would cost us the rebate from the cans and bottles just in petrol to travel to Forster from Taree (Taree is the main larger hub town of the area so should have been serviced first) in the hope that the collection centre may not be overloaded and we can get that fuel money back making it a completely wasted trip so again hey we might as well just throw our trash everywhere, out the window of the car etc because we've now paid for the privilege to do so. This scheme was obviously either a masked grab for cash or GROSSLY mismanaged which I'd expect nothing less from the liberals and greens. Liberals like to bag on labour for the NBN then do something stupid like this. I'm totally and utterly disgusted!
