Submission: I buy my electricity from Red Energy...they tell us that they are a wholly owner Australian company and a subsidiary of Snowy Hydro. Despite all of this, their solar feed back tariff in a mere 11.1 cents which is somewhat lower than the lowest of your recommended rates. When approached, I was told that they had no intention of negotiating their rates....like it or lump it. At present, as you might imagine, I am negotiating a better overall deal with another supplier.
