SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017

12:26:15 PM

Dear IPART,

I fully support a fair price for solar and strongly believe the feed-in tariff should increase in line with the wholesale price of electricity. The feed-in tariff should not just be a benchmark range, it should be regulated so retailers have to offer it as a minimum. The feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar.

I have had solar installed since building a new house two years ago and the feed-in tariff has been well below the cost of buying electricity on the occasions where my solar is not producing enough energy to meet my needs.

Yours sincerely,
Graham Robinson
