I have grave concerns about the future related to the environment and wise use of natural resources. This is a major reason for installing solar generation. It does seem grossly unfair that having invested so much money to instal solar power that the power delivered to the grid is taken and resold at such a vast profit. As this amount reduces the costs for the generators and suppliers surely there needs to be recognition of this and reward those generating for them and not simply rewarding shareholders and executives of the companies involved. Further as generation and distribution costs are forecast to rise significantly, any price return should be linked to the standard rates set by the energy retailers.cost increases and
