SOLAR FEED-IN TARIFFS 2017/18

Tuesday, 9 May 2017

11:06:53 AM

1. i support a fair price for solar for too long have we been paid a pittance for the power we generate it needs to be fair.
 - 2.the feed in tariff should increase with the wholesale price of electricity
 3. The feed in tariff should represent the true value of solar this means recognising the environmental and health benefits of rooftop solar.
 4. The feed in tariffs should not be a benchmark range it should be regulated so retailers have to off it as a minimum.
 5. The feed-in tariff should represent the true value of solar, this means recognising the environmental and health benefits and the network benefits of rooftop solar; and
- last of all i was getting 60 cents i understand that was generous but i am disabled and it helped my family with the cost of living as soon as the subsidy was gone the money we get for generating revenue for the electricity companies is very poor and not fair.
- thankyou for reading my submission
