SOLAR FEED-IN TARIFFS 2017/18

Saturday, 20 May 2017

7:31:41 AM

I wish to show my support for the increase to the solar feed-in tariff as a fairer price should be paid for the power that is being supplied by people who have had solar panels fitted. I see no reason why the feed-in tariff should not be increased in line with the wholesale price of electricity and this amount should be regulated to ensure that electricity retailers offer this amount as a minimum rather than using the figures as a benchmark only. I had solar panels fitted as I understood they are environmentally friendly and offer better health benefits over time rather than continuing to use the older style coal fired power stations, as such I think this should be recognised and a fairer system put in place to compensate people who have gone to the cost and trouble of having the solar panels installed.
